Android 4.0.3 + Version: 1.11.1 1735.4Mb Warner Bros. International Enterprises LEGO Marvel Super Heroes (MOD, money/magnet) - you will learn the history, which takes place in the Marvel world. At your disposal are your favorite heroes, Captain America, Hulk, Iron Man, Spider-Man, Wolverine and many others. It is your responsibility to prevent the mission of Loki and the other villains to create a super-powerful weapon that can destroy the world. The LEGO series is one of the most popular series around the world. There have been many franchises adapted into this LEGO game, such as Lego The Hobbit and Lego Marvel Super Heroes. Let's take a look at the game in which LEGO has entered the DC Comics superhero universe, LEGO Batman: Beyond Gotham. Experience the feeling of becoming a hero in this game - Batman in this game will go beyond Earth and fight criminals beyond Gotham. Experience to help his friends in the Justice League this time. Green Lantern is threatened by Brainiac's artificial intelligence and many members of the Green Lantern Association fall. Brainiac also wishes to conquer the entire Green Lantern Corps and the Earth. In order to be able to save them all, we must rely on the help of the other members of the Justice League. Gameplay When players control their characters from the third perspective, the gameplay is fascinating. The player receives a message from Green Lantern, he or she will be able to travel to an extraterrestrial world to assist. It is possible to control Batman and add another superhero, but that second superhero can be changed depending on the situation. Batman will not be altered because he is the main character has a different skillset to fight criminals and monsters. Almost all of the power of the characters in the game is based on the movie. As an example, Batman does not have any special abilities like other people, only the power of weapons and the powers, such as the ability to shoot lasers from his eyes. A player can control one character, but you will be able to control two characters. Players can switch characters whenever they wish, and the remaining characters will support them in battle. One of the unique features of this game is the manufacturing features of this game is the manufacturing features of the unique fe can even be used to create battle suits that can be used in different situations. Coins are plentiful in the game, but they can be used for various purposes, such as unlocking characters or buying weapons. More than 150 different characters are available in this game, including bad guys and heroes. Every Marvel character has its own unique abilities and features that are key to making the best use of these abilities and features that are key to making the best use of these abilities and features that are key to making the best use of these abilities and features that are key to making the best use of these abilities and features that are key to making the best use of these abilities at the right time for them to work together. For example, the Star Jazz can fly freely using a jetpack, the captain of the United States can throw a shield trigger, and Raytheon is good at releasing lightning to charge the machine - features that are perfect for solving puzzles in specific locations. The fully armed rocket raccoon, Iron Man, Hulk are very good at fighting to show their talents. As the game progresses, more and more new heroes will gradually . In addition to being able to provide you with a brief freshness, the newly ed heroes will be able to return to previous levels in free mode to solve the organs or puzzles that the old heroes can not solve for the time being. And this also greatly enhances the game's repeatable play value. Associating each superhero is an original story about the same level as most "chaos" games. Of course, LEGO is still doping some of its own unique humor. For example, every time when the director of the SHIELD shields his snacking drinks, the Star Trek will easily be able to dance with a lot of characters while playing music. Compared with the more serious works of the same genre, "LEGO Marvel Super Heroe "Actually nothing really narrative level of value at all. It is closer to an all-age Marvel theme virtual park. Fighting, collecting and puzzle solving are the main components that fill the game's flow. No matter which part is more or less with the restructuring of Lego blocks associated. Such a design idea may already be well-established for the hardcore LEGO fan, but given that virtually no other player in the market except LEGO uses similar puzzle logic in the game, it is still possible for unfamiliar players At the beginning, you have to have a glimpse of water. For example, players who used to play the traditional RPG may find it hard to think that they actually need to use the blocks to fight weapons on the battlefield of BOSS. People who are accustomed to pushing boxes, pressing buttons, searching for passwords and other traditional solutions to the mystery will not be too easy in an instant to turn their core solutions to "destruction and reorganization." In addition, like other LEGO titles, LEGO Marvel Super Heroe is far too simple for players who are familiar with the inherent logic of LEGO's game and are a little more advanced. Fighting is basically a fool's death, death can not only resurrect the original full of blood, but also has unlimited life-long. The building blocks are in every corner of the game, and in theory can be repeated as often as you want - for middle to high-end players, access to such resources at your fingertips probably will not have any sense of accomplishment at all. So this also leads to a very controversial issue, that is, this "full-age" game is not suitable for all players. To be honest, it's hard to recall even an exciting moment in the game. Whether it is fighting, collecting or solving puzzles, I seem to be able to get the brain on standby, just relying on the instincts of biological conditioned reflections. When playing to the game in the late play a cinematic animation, accompanied by the star selection of songs, I drowsily into sleep. It was about four in the afternoon, with warm sunshine on the face - when night woke up, the night was over, and the stars in the screen were still twisting with the rhythm of the music. This is the most wonderful time I spent in this game.-apkawarD.Com Like most other Lego games, this game is still primarily aimed at children, parents who want to spend their own time with their children, loyal LEGO toy fans, and some light puzzle lovers. And they do not need overwhelming reorganization of the mechanism, otherwise it will increase the unnecessary cost of learning; do not need more difficulty, because "arbitrary" was originally Lego Part of the charm. Considering the very large differences in capabilities among the various characters in the game and the fact that there are basically no signs of any adjustment in the balance, this model is virtually non-athletic and fair at all. Like the overall style of the Lego game, the maximum value of this model still lies in the bustling family scene: the outcome is not important and the delight is the king.
